

JMS Group Australia

MINING, CIVIL, ENGINEERING AND
ASSET MAINTENANCE SPECIALISTS

We deliver comprehensive industrial maintenance services, consumables and industry-leading expertise to the mining, resources, civil and heavy industry sectors throughout Australia.

About Us

Proudly Australian owned, JMS Group (JMS) specialises in the supply of services, including asset maintenance, fabrication, mechanical overhaul, project management and labour-hire to the mining, gas, civil and heavy industry sectors.

Established in 2009, we have diversified and grown our capabilities to meet the demand for delivery of high quality services at sites throughout Australia. We have a reputation for excellence and the timely delivery of products, services and labour. Above all, we pride ourselves on our overriding commitment to the safety and welfare of our employees and all those involved with JMS.

Our Head Office is located in Rockhampton, Queensland, in a purpose-built facility to accommodate our dedicated team of various trades and technicians. With our continuous improvement program and our progressive management team, JMS is primed to serve the needs of clients now and well into the future.

We are your engineering solution specialists

The JMS Management team, engineering professionals, as well as our broader team have extensive experience in the mining, resources, civil and heavy industry sectors enabling us to provide unsurpassed expertise, guidance and service.

Our Director Brett Dixon, as well as the JMS Management Team, work closely with you to provide a client-focused relationship where we proactively work to anticipate present and future requirements.

Passionate about achieving quality outcomes which exceed client needs and challenges, we demonstrate this by ensuring we provide sustainable, value-adding solutions and engage people who are fully committed to the delivery of exceptional results, safely, on time and on budget. We go above and beyond what is expected at every opportunity!

Mining Capabilities

From project start-up to established operations, JMS provides the resources and skilled labour to meet and exceed any challenge.

Initially delivering underground maintenance for one of the largest mining companies in the Bowen Basin, we now supply high-quality mining products, services and labour to numerous mining operations, both surface and underground. JMS have been an integral contributor to the Bowen Basin's mining success story.

From quoting, planning and staffing through to the execution projects, each requirement is carried out meticulously with the utmost attention to detail to ensure a seamless client experience and a superior outcome. With an outstanding track record of partnering with our clients to deliver results, we are the people to trust on-site and as always, this is underpinned by our commitment to safety and Zero Harm.

Turnkey Solutions

JMS provides turnkey solutions with easy to implement equipment to enhance business performance. Our experienced team will partner with you to determine a range of options and create solutions that are individually tailored to your needs and objectives. We believe it is paramount that our clients are kept informed on current technology and future advancements, enabling us to provide ideal solutions and post-completion warranty support

JMS offers an extensive range of turnkey solutions for any project

Design, Supply, Construction and Installation

- Safety mechanisms and structures
- Conveyors and guarding
- Stairways, platforms and railings
- Poly water line
- TCP MCC switch room
- Conveyor replacement
- Conveyor structural work upgrades
- Slurry pipes
- Reflux classifier nozzles
- Wear resist fibre glass bandages
- Microcell poly elbows and sleeve
- Liner plates
- Wear liners
- Pump bases and guards
- Conveyor guards
- Feed chute
- Cyclone con chutes
- VCD supply
- QDS
- Mining consumables
 - Underground
 - Hard rock
 - Open cut

Maintenance Capabilities

You can rely on us to service or repair any asset across Australia.

Providing both skilled field technicians for onsite maintenance and expert tradespeople at our purpose-built workshops, JMS delivers prompt, reliable and efficient maintenance services.

From total solution design, project management for planned and unplanned maintenance & refurbishments, through to rapid emergency repair turnaround, one-off fabrication/installation projects and labour supply, we are equipped to cater for all service requirements.

We provide services for industrial assets including conveyors, preparation plants, warehouses and site offices, including, but not limited to:

- Fixed Plant Maintenance – Asset Maintenance and project management
- Mobile plant repairs and refurbishment

Fabrication Capabilities

JMS can make any fabrication design a reality

The JMS engineering and fabrication workshop based in Rockhampton has the necessary facilities to support our mobile teams of tradespeople and technicians in a wide variety of heavy and light fabrication and repair work. This highly trained and dedicated team pride themselves on delivering innovative and robust solutions to meet any fabrication challenge.

Our Workshop

We specialise in the fabrication of various piping, mechanical and plate work fabrications, pressure vessels, tanks, machining, profile cutting and associated steelwork.

With equipment that is second-to-none, we are continually investing in emerging technology, adding to our already extensive inventory. Our focus on continuous improvement enables us to deliver first-rate solutions that meet site compliance requirements.

Our workshop capabilities include:

- Machining
- Automated plate cutting and processing
- Bending/forming
- Design/fabrication/welding
- Refurbishments
- Equipment servicing and overhauls
- Coating
- Mild steel, stainless steel and aluminium works

Mobile Maintenance Facilities

Not simply limited to a workshop, our action-oriented teams are consistently achieving results in the field.

- Site compliant vehicles
- Fully fitted welding trucks and trailers
- Equipped tooling containers, including equipment for:
 - Rigging and lifting (full inventory)
 - Light, medium, and heavy fitting
 - Site fabrication and precision welding
- Heavy delivery vehicles

Fabrication Projects

Electrofusion Tower Platform

Queensland Magnesium - Parkhurst Operations

Fuel Farm Relocation and Construction

Thiess Lake Vermont

Platforms and Stairways

Steel Pipe Work

Access Stairways

Fabrication, supply and installation of AC3 ash and dust conveyors

Stanwell Power Station

Supply and installation of dewatering poly pipe line

BMA Blackwater

With an expansive talent pool of tradespeople, technicians and support resources, we meet any client needs or challenges.

The JMS Team

JMS employs a diverse workforce with extensive skill sets and technical abilities to provide ideal outcomes for our clients. We pride ourselves on our strong, familybased culture that we have actively worked to develop for over a decade.

From our Director through to the entirety of the JMS workforce, we are proactive in our values of safety, quality, integrity and continuous improvement which we demonstrate by investing in the ongoing training and development of our people and engaging only those who are dedicated to safety, excellence and innovation.

JMS is immensely proud of the apprentices we engage and have helped over the years to achieve their trade qualifications. They are the future of our business.

A safe culture for everyone

The JMS Culture is one that prioritises safety above all else. Operating in high-risk industrial environments demands an additional layer of rigorous controls, in order to meet site and legislative compliance requirements. Our Human Resources and Work Health and Safety teams work closely with our Management team to ensure all employees and contractors have the relevant qualifications, licences, certificates and site inductions. This is proactively monitored and audited to ensure all legislative obligations are met.

Labour Hire Availability

JMS offers rapid response to client needs and challenges, providing skilled labour to complete work to the highest standard of safety and excellence.

- Project Managers
- Highly Skilled Supervisors
- Safety Officers
- Electricians
- Heavy Equipment Fitters
- Mechanical Fitters
- Pump Fitters
- Machinists
- Boilermakers
- Poly Welders
- Trades Assistants
- Carpenters
- Concreters
- Open Ticketed Crane Drivers
- Riggers
- General Maintenance Workers

HSEQC

Whether we are on your site or ours, safety, the environment, quality and community are at the forefront of our minds. This is our commitment to our clients, community and each other.

Health and Safety

At JMS, health and safety take priority above all else. We are committed to Zero Harm and are uncompromising in our commitment to the health, safety and wellbeing of our people, our clients and our community. We operate an ISO 45001 safety system and management program, which is underpinned by our WHS policies, standards and operating procedures. We comply with all relevant Workplace Health and Safety legislation, standards and client operating procedures and safety requirements.

Environment

With ISO 14001 environmental accreditation, JMS is both aware of our obligations to the environment and are proactive in mitigating environmental impacts. We aim for the highest practical standard of environmental care and responsibility in all our operations.

Quality

Accredited to ISO 9001, we have a rigorous and proactive focus on quality management. From our mobile maintenance and site teams through to our workshop, clients can be assured that our work meets international standards with a key focus on process control and continuous improvement.

Community

As a team, we are committed to the communities in which we operate. Respect and trust guide the way we collaborate with our communities. We believe that ongoing engagement benefits all stakeholders, including landowners, shareholders, employees, contractors and the broader community.

JMS strongly supports the community through our hiring of local people, leveraging local supply chains and our partnerships with regional businesses. We also support important causes such as the Cancer Council, Movember and Men's Mental Health, in addition to local health and fitness facilities.
